### Life Book

Open your life and you will find,  
People and places of all kind.  
Some are full of tamarind sour,  
And some are happy to soar.  
Open your life and dive into  
the words,  
Acquaint with few real 'n'  
unreal worlds.  
Both always add new learning experiences,  
Some are free and some with expenses.  
Life is a book, never let it go in vain,  
Do good bring glee or wait for a pain.  
Accounts of deeds reflect persona too,  
You read it to me 'n' I'll read it to you.

### A Graceful Night

After an Exhausting,  
Basic eight-hour,  
There comes an  
Soothing eve,  
The birds have gone to their roosts,  
The Animals went to sleep!

Now comes a dazzling night,  
The flourish full moon, is shining bright  
The blanket of stars stretch to infinity,  
Yes the night is dark,  
Its silence is deep,  
I was looking at the sky,  
When I fell asleep!

## Trees and Me

Here, Here, Here,  
Whenever I feel fear  
I go to the trees, talk to the leaves.  
Trying to take rest,  
Under the trees in the west  
When the sunlight touches my  
body from tree to my head.  
The peace I feel, can't express  
If you have never gone to the trees  
and talked to a  
leaves so, when you ever feel like me.  
Go to the trees, talk to the leaves and be fearless as me!  
Go to the trees, talk to the leaves, talk to the leaves.

## My Values

I took a day to find a way  
With how to pronounce hey or hay!  
That's called hard work.

I wake up with sunshine,  
That's some sleep with lime.  
At the clock on time,  
That's called punctuality.  
There are hundred beggars in city,  
Do you ever feel pity?  
Then I give them two chapattis  
That's called Mercy.

## Changes in learning during pandemic

"The COVID-19 has resulted in schools shut all across the world for long period of time. Globally, over 1.2 billion children are out of the classroom." When we read such news naturally we compare it with the situation which we all are facing. With the outbreak of novel corona virus the schools have started the online teaching-learning initiative. This was a unique experience for both teachers and students since most of them had not experienced such a scenario ever before. However due to the tireless efforts, leadership and meticulous planning by our School principal and coordinators we could implement this initiative without any major problems. Although this way of Teaching-Learning was new to Teachers, students and parents, everyone extended their cooperation and got adapted to the new way. This is the best example of how by planning, leadership and cooperation we can achieve great success...!!! Initially there was lot of apprehension amongst everyone as how COVID -19 will impact the children and their future as schools were closed at a very short notice. Although there were initial hiccups two months later the school is running smoothly and we all are working together in resolving issues as we come across them. Teachers are teaching via various virtual platforms every day and students participate actively in these sessions.. Students do individual work, group work, and discuss with teachers when needed. The pandemic is forcing educators, parents, and students to think creatively, communicate, collaborate and be agile. It has developed and bought forward different abilities within students. Students will have to take the ownership over their learning, understanding more about how they learn, what they like, and what support they need. They will personalize their learning. But believe me **"Real change takes place in deep crisis. Every crisis creates and opportunity and let's take pledge to turn this adversity into an opportunity for all of us."**

## Beauty of Living

'Living' not just means a way of life or lifestyle but it is more than that. It means being alive in the moment. It is actually beyond words! It's a strong feeling which can be experienced by actually living in the moment. Right now I'm sitting in my balcony, writing this and looking at the sun glowing and shimmering in the pretty sky. What are you doing? Probably you are dwelling on the past or worried about future or something else but not living in the moment. There is a saying 'everything happens for good' and 'what's meant to be will be'. And it is somewhere true which every one of us knows. So what are you worried about? Instead, why don't you live, explore this moment because it's never going to come back. There's a way by which you can do so. Just smile and be alive without thinking anything else but by being into the moment. I know it's not as simple as it may seem. May a times we just live because we have to or we just live thinking about what I have done and what I have to do next in this fast forward life. We eventually forget to have fun at the moment that we are living right now.

Paridhi Shah  
(11-E)

I strongly believe that at the last breaths of your life you will realize that you have lived every small moments of your life with love and joy. We all should live our one precious life fully and entirely with all the love and happiness.

**Education is the key to unlock the golden door of freedom.**

## Love Yourself

**Tanya Gohil**  
(9 - H)

If you ever get afraid, be aware,  
It's not only you in the world,  
Just trust me everything is going to be fine,  
I swear It's going to be fine,  
(Just be aware)  
It's not easy, I understand  
But for yourself, just take a stand

Why a cage, to your range  
Try a new stage for a change  
(Just take a stand)  
If someone tells you to change, don't listen  
They are jealous from your range  
They just can't reach to your heights  
So obviously they'll fight  
(Just don't listen)

### PARENTS FEEDBACK

As we all are aware that we have been going through unprecedented time due to covid-19. This compelled us to come out with

the new way to learn and live our day to day activities. Shree Vashishtha Vidhyalaya, Vav came out with blended teaching classes to encourage their students with learning and continuing with the academic session. I would like to thank our beloved Principal Dr. A. K Gaur, Academic Co-Ordinators and all the other teachers. These virtual learning classes are unique and amazing experience for our kids. They are learning so many new things because of this. The classes are very much exciting, effective and interesting. I am also happy because I am also learning so many new things with these classes. The efforts and dedication of teachers and other staffs are very much appreciable because it's very tough task to keep children attentive, engage throughout the session without getting bored.

I still remember, on 21st March 2020, our country India came in the clutches of Corona pandemic. During this time, our

Prime Minister announced the total lockdown for the entire nation. After the successful lockdown in the month of June people were allowed to lead their normal lives but under strict rules. But due to the carelessness of people, the most fearful thing happened. The cases of corona started rising at fast pace every day. During this serious condition Schools started a new mode of teaching called ONLINE TEACHING. Shree Vashishtha Vidhyalaya too immediately adjusted to the new education technology (using Zoom) and imparted knowledge to all the classes. The teachers also gave regular class works and home works. Therefore, with their utmost care they taught the students as if they were attending offline classes. Students even attended examinations and learnt a lot by sitting in their homes.

**By Parents Rupen Savaliya (9A)**

My experience about online classes conducted by SVV helped my child to acquire and gain knowledge even in this tough situation of pandemic. Students have got engaged in daily activities of Online Classes as students are not getting bored. Due to this, pandemic, there were many great losses to many families but due to this students got a way to connect with the school digitally. Teachers showed a great effort to ensure that their students are studying properly. They provided Study Materials like Worksheets, PDFs etc. School also took online exam to ensure that

how much their students have learnt. Online classes were a platform for students in many new things to learn. I would like to thank Principal and teachers who shown their efforts and ensure their students learn beyond obstacles.

**Failure is not opposite of success; it is part of success.**

As parents, we were very alien with the concept of new normal classroom that is 'online classes'. These classes created a new ray of hope during the dark phase of all our lives. Positives of Online classes are that they conducted in the comfort of our home, they are mostly accessible, school traveling time is also reduced and the most crucial thing that my ward's education has not taken a leap like every other thing, every coin has a flip side. The flaws were that many students' self confidence has been deteriorated as physical communication did not take place, physical health has also been affected and there screen time has been significantly magnified. But we all passed that phase with immense support from our respected teachers and all the parents supporting their children. In the end we got a wonderful and fresh experience and life is all about it.

**By Parents of Diya Chauhan (10E)**

I am very kind to you for providing online classes for the students despite of Corona Pandemic. Online classes help to get in touch with study and give comfortable learning environment for the children. Students are able to clarify their doubts in a proper manner. Regular periodic & prelim tests were also taken which built up confidence level for exam. Enough revision was provided.
