SOFTWARE

## SOME STATEMENTS FROM JAIMINI SOFTWARE

### ART... CREATIVITY... TRUST

we develop innovative and creative products and services that provide total communication and information solutions. Among a surplus of services, web design and development, tailor made applications, ERPs, CRMs, e-commerce solutions, business-to-business applications, business-to-client applications, managed hosting and internet portal management are few that we offer.

We deliver high quality, flexible web site designs that are easy to maintain, modular to facilitate enhancements, and are reliable, secure and easy to deploy. We provide responsive website design using latest technologies like ASP.NET and C#, Visual Studio, Signal, ASP.NET Web services, SQL Server, HTML5, CSS3, AJAX, JQuery, JSON, AJAX, Bootstrap, Ionic Android, Phone Gap, Node JS, Flutter, Android Studio, Visual Code, Firebase Integration, Google GPRS API and many more. Web design is the process of creating websites. It encompasses several different aspects, including webpage layout, content production, and graphic design. While the terms web design and web development are often used interchangeably, web design is technically a subset of the broader category of web development. Apart from web and desktop development, we have a covered a good market in android application development with the level of satisfaction of client.

### MISSION

“To deliver best to our clients through innovative use of technologies, support, services and customer referrals; and also to be the best high technology company in our markets”. We believe in term “developed on demand”.

### VISION

See farther to seek out competitive business advantages for our clients through the innovative use of technology and to help them achieve long-term success and prosperity. “Solution at your doorstep”.

## HOSTING AND DOMAIN SUPPORT

Domain Registration Services offers fast search & registration of available domain names in worldwide, plus affordable web hosting solutions. Buy with confidence - we're providing friendly hosting space and domain registration to the client via a team of experts.

## THE TERM WEBSITE

### WHAT'S YOUR WEBSITE MADE OF?

#### ***Front-end***

We implement design of any complexity and graphical richness. As well we create responsive designs that offer smooth experience on all screen sizes and resolutions. We'd love to consult you on choosing between a responsive website and a combination mobile + desktop.

#### ***Backend***

The rear-guard of your website: the databases and the logic created and stored on the server side. It's all crowned with a content management system (CMS), either pre-built or custom, tailored precisely to the specific needs of your business. We can develop it in parallel with the front-end to save your time.

#### ***Maintenance***

Your website has to be continuously adjusted to new versions of all major browsers and changes in connected third-party services. The same people who created your website can take care of it further on for maximum efficiency.

### WE BRING ADVANTAGES FOR YOUR BUSINESS WITH OUR WEB DEVELOPMENT SERVICES

- ✓ Front-end/backend/web services (website/admin panel/API);
- ✓ Application of CMS (ASP.NET with C# or Windows ASP.NET Applications) or creation of a custom one;

- ✓ Integration with cloud services (C# Web services);
- ✓ Such integrated features as live chat, Google Maps, Facebook, PayPal, LinkedIn, Twitter, Google Checkout, etc.;
- ✓ Complex deployment solutions for hosting, dedicated or cloud servers;
- ✓ Mobile web apps (for access from mobile devices);
- ✓ Custom web services and APIs for mobile apps;
